## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 50 and 51 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S.

Patent No. 6,078,100 Duesman et al.

1. Referring to claim 50, a semiconductor device comprising: a semiconductor substrate, (Figure 4a examiner's label #4); a first wiring layer having a first thickness, (Figure 4a examiner's label #2), extending in a direction parallel to a surface of the semiconductor substrate, (Figure 4a examiner's label #4), and provided above the semiconductor substrate, (Figure 4a examiner's label #4); a second wiring layer having a second thickness, (Figure 4a examiner's label #1), greater than the first thickness, (Figure 4a examiner's label #2), extending in the direction, (the vias radius extends in a direction parallel to the substrate surface), and provided between the semiconductor substrate, (Figure 4a examiner's label #4), and the first wiring layer, (Figure 4a examiner's label #2); and a third wiring layer having a third thickness, (Figure 4a examiner's label #3), greater than the first thickness, (Figure 4a examiner's label #2), extending in the direction, (the vias radius extends in a direction parallel to the substrate surface), and provided above the first wiring layer, (Figure 4a examiner's label #2).
2. Referring to claim 51, a semiconductor device comprising: a semiconductor substrate, (Figure 4a examiner's label #4); a first wiring layer having a first thickness, (Figure 4a

examiner's label #3), extending, (the vias radius extends in a direction parallel to the substrate surface), in a direction parallel to a surface of the semiconductor substrate, (Figure 4a examiner's label #4), and provided above the semiconductor substrate, (Figure 4a examiner's label #4); a second wiring layer having a second thickness, (Figure 4a examiner's label #2), smaller than the first thickness, (Figure 4a examiner's label #3), extending the direction, and provided between the semiconductor substrate, (Figure 4a examiner's label #4), and the first wiring layer, (Figure 4a examiner's label #3); and a third wiring layer, (Figure 4a examiner's label #5), having a third thickness smaller than the first thickness, (Figure 4a examiner's label #3), extending in the direction, and provided above the first wiring layer, (Figure 4a examiner's label #3).
